

Generate a New Token

In order to generate a new token / API key there are a few prerequisite steps that must be followed first. Please be sure of the following before proceeding.

- **Unlimited Plan**

- In order to generate an API token and make use of the API calls you must have a current unlimited plan
- If you purchased the unlimited plan, generated a token, but then switched plans your API token will no longer work.
- You can check your current plan status from the Dashboard after logging in under My Plan

- **Dashboard**

- Generating new tokens can only be done from the DEVSEY dashboard
- You must be logged into your DEVSEY account and have the unlimited plan

Once you've checked all the prerequisites you can generate a new token from the dashboard.

For reference the steps required are:

1. Sign into <https://devsey.com>
2. Click Dashboard from the top right menu
3. Verify you are currently an unlimited plan member by clicking My Plan
4. Next to My Plan click Dashboard to take you back to your main dashboard
5. Scroll down to API Access
6. Click the green Generate Key button
7. To the left of the green Generate Key button you will see Your API Token, and below that your new API Token
8. Click the token, it is a hyperlink, it will automatically copy the token to your clipboard.
