

List All Apps

/app-view

- **API:** <https://devsey.com/api/app-view>
- **METHOD:** GET

HEADER

- **Authorization:** API Token required
- **Accept:** application/json

POST Variables

- NONE

GET Variables

- NONE

RETURN

- **unique_id:** string
 - /report-view-by-id
 - app_id
 - /report-advanced-create
 - app_id
 - /app-remove
 - app_id
- **title:** string

- **url**: string
- **created_at**: timestamp
- **app_screenshot**: string
 - You can pair the app_screenshot return value with our url to view the images:
<https://devsey.com/storage/>

Additional Information:

The **unique_id** return from this API can be used on other APIs: **/report-view-by-id**, **/report-advanced-create**, **/app-remove**. In order for those three APIs to successfully complete you must have the app_id (unique_id). This means that you would need to run the **/app-view** API first in order to get the app_id (unique_id) you wish to make reports or screenshots for. The return section above describes what variables the unique_id can be used for.
